

1) Click on “Create a new project”:

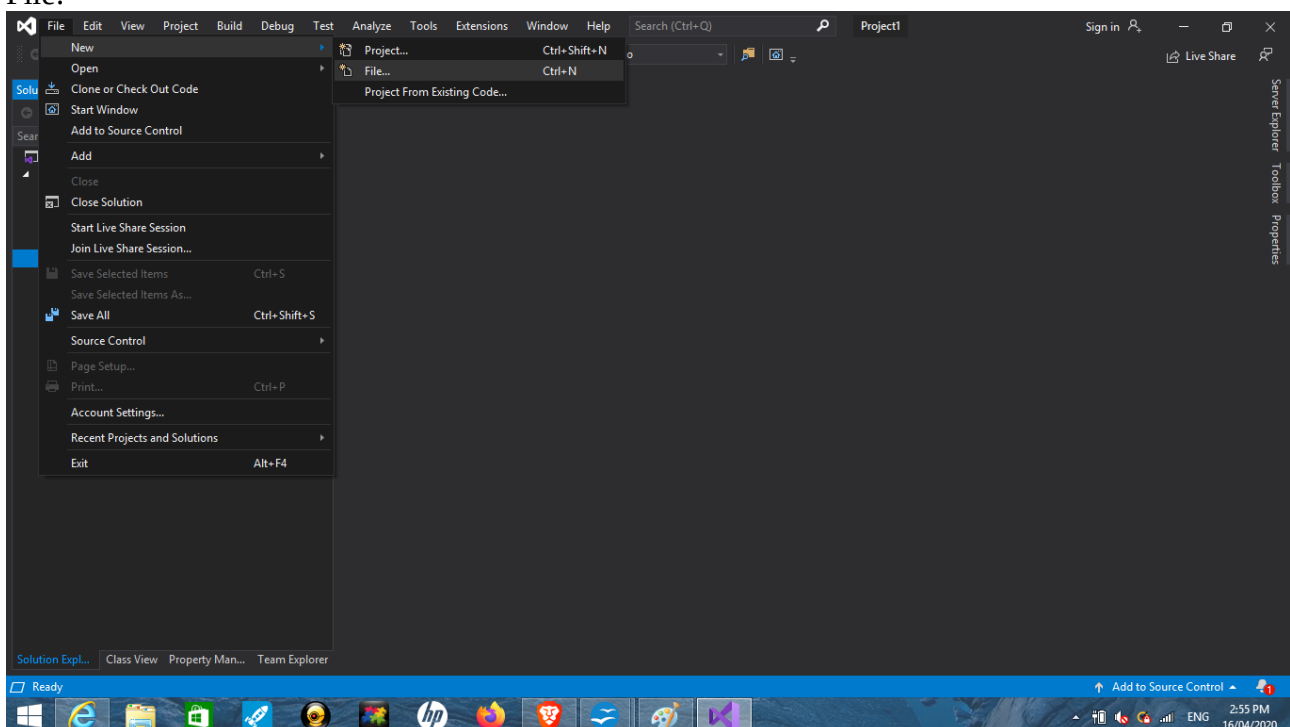

2) Select “Empty Project”:

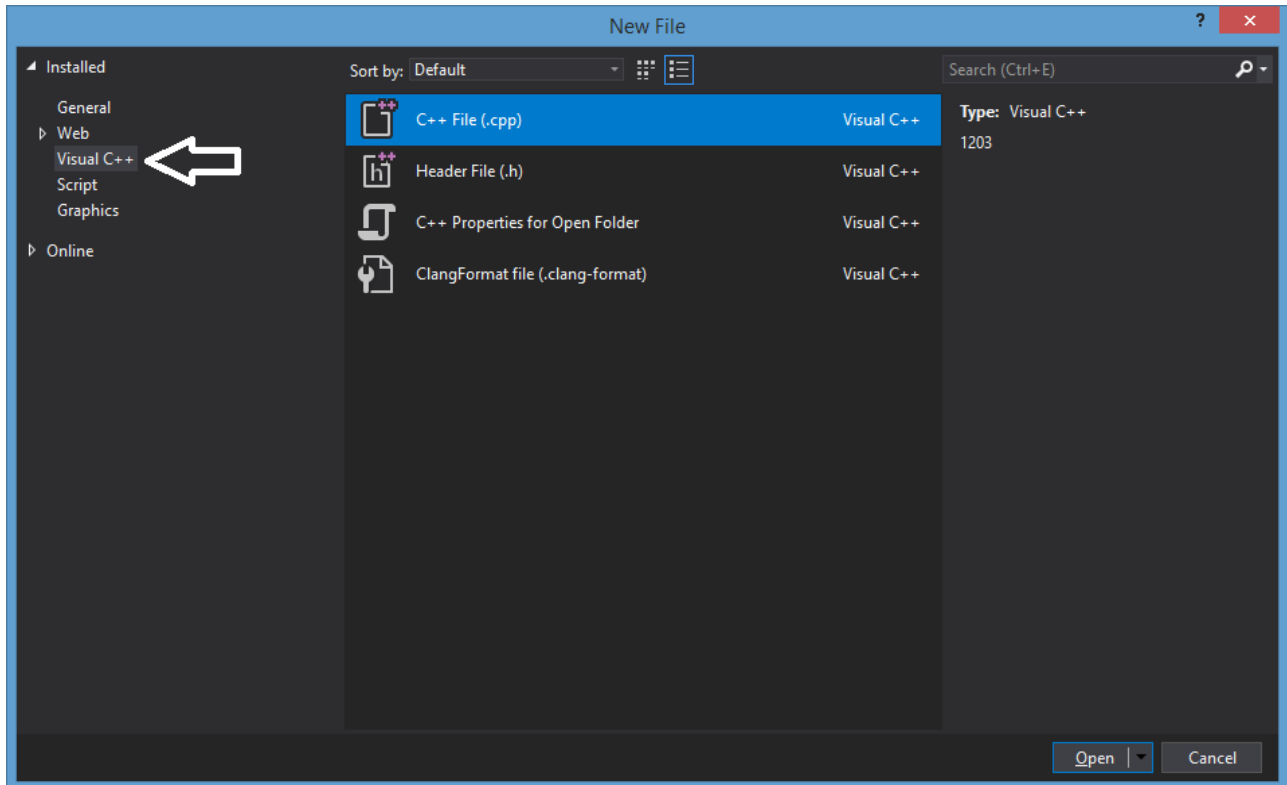

3a) Add a C++ file to the project (option 1) by right-clicking Source Files >> Add >> New Item:

3b) Option 2: Alternative, you can also add a C++ file to the project by clicking File >> New >> File:

4) Then select “Visual C++” (white arrow) and then “C++ File (.cpp)” (blue highlight). Click Open:

5) Once your code has been entered, click on “Local Windows Debugger” (yellow highlight) to execute your program:
